

## Erratum

In the article entitled “Knowledge and Attitudes about Helsinki Declaration on Patient Safety among Anaesthesiologists in Turkey: A Questionnaire Study” by Pelin Çorman Dincer et al., published in the December 2020 issue of the Turkish Journal of Anaesthesiology and Reanimation, authors erroneously did not included the Patient Safety Questionnaire Study Group to the author list.

Editorial Board evaluated the authors’ request to add Patient Safety Questionnaire Study Group to the author list and approved the change request. Thus, the author list, author contributions section, and acknowledgement section have been updated in the article.

You can access the corrected version of the article through the link below:
