EAJEM

Eurasian Journal of Emergency Medicine

Citation abbreviation: Eurasian J Emerg Med (Formerly Akademik Acil Tıp Dergisi)

Aims and Scope

Eurasian Journal of Emergency Medicine is the scientific and official publication of the Emergency Medicine Physicians Association of Turkey. The journal is published 4 times in a year in March, June, September and December and it has been in publication since 2003 as an open access journal.

The journal's target audience includes Emergency Medicine experts, faculty members who conduct scientific studies and work in the Emergency Medicine field, researchers, experts, assistants, practicing physicians and other health sector professionals.

The journal publishes scientifically high quality articles which can contribute to the literature and written in the Emergency Medicine field and other related fields. Review articles, case reports, editorial comments, letters to the editor, scientific letters, education articles, original images and articles on history and publication ethics which can contribute to readers and medical education are also published.

Eurasian Journal of Emergency Medicine is an international periodical which implements independent and unbiased peer review principles and publishes in English languages. Articles are evaluated through double-blind review process. Information on article submission rules and process is available in the information for author's page at www.eajem.com and in printed issues. Statements or opinions expressed in the published manuscripts reflect the views of the author(s); the editors, the editorial board, the publisher and the Emergency Medicine Physicians Association disclaim any responsibility or liability for such materials.

The journal's editorial and publishing process is adherent to standards of International Committee of Medical Journal Editors (ICMJE), World Association of Medical Editors (WAME), Council of Science Editors (CSE), European Association of Science Editors (EASE) and Committee on Publication Ethics (COPE). Eurasian Journal of Emergency Medicine is indexed in Thomson Reuters-Emerging Sources Citation Index (ESCI), TÜBİTAK ULAKBİM TR Index, EMCare, DOAJ, EBSCO, EMCare, CINAHL, GALE and ProQuest.

Subscription Information

Eurasian Journal of Emergency Medicine is printed in limited numbers on acid-free paper and distributed to Emergency Medicine experts and academicians free of charge. Full-text issues of the journal are available at www.eajem.com, free of charge.

Copyrights and Permissions

Copyrights of all published content belong to the Emergency Medicine Physicians Association of Turkey by the authors' written permission with the rights granted by all relevant local and international laws. Published content can be cited in scientific publications and presentations however, the Editorial Office should be consulted for the use of all published manuscripts and images for any other purposes and for re-print permissions.

Financial Support and Advertisement

Main financial support for the Eurasian Journal of Emergency Medicine is provided by the Emergency Medicine Physicians Association of Turkey. In addition, advertisements and announcements of products and services which are not contrary to the results of scientific studies are published in the journal to create revenue for the journal. The Editorial Office should be contacted for advertisement arrangements.

EAJEM

Eurasian Journal of Emergency Medicine

Citation abbreviation: Eurasian J Emerg Med (Formerly Akademik Acil Tip Dergisi)

Instructions to Authors

Eurasian Journal of Emergency Medicine, as a double-blind peer reviewed journal published by the Emergency Medicine Physicians' Association of Turkey, publishes original articles on clinical, experimental and basic sciences in the Emergency Medicine field, review articles covering basic and up-to-date subjects, case reports, short editorial manuscripts and manuscripts covering medicine history and publication and research ethics. The journal only accepts manuscripts submitted through the www.eajem.com internet address and manuscripts submitted through any other channels will be rejected.

Citation potential, originality and high scientific quality are the most important criteria for a manuscript to be accepted for publication.

Statements or opinions expressed in the published manuscripts reflect the views of the author(s); the editors, editorial board, publisher and Emergency Medicine Physicians' Association disclaim any responsibility or liability for such materials.

Articles submitted to the journal will only be reviewed if they have not been previously published in any electronic or printed media except abstracts, presentations, reviews and as part of a dissertation. The Editorial Office should be informed during submission if a submitted manuscript has previously been submitted for consideration to another journal and rejected, and if so submission of previous reviewer reports is mandatory. This practice will help to speed up the decision making process on a manuscript. If a submitted manuscript had previously been presented at any meeting, the name, date and city in which the meeting was held should be stated.

The author(s) should transfer all their rights to their submitted manuscript within the scope of local and international laws to the Emergency Medicine Physicians' Association upon acceptance for publication. For this purpose, the Copyright Transfer Form should be signed by all authors, submitted through the online manuscript submission system and the original copy of the form should be posted to the editorial office of the journal. The author(s) accept that they will not publish the manuscript in the same language or in any other language in another media and will not authorize a third party to do so.

Any form of content used within the manuscript is the author's responsibility. Financial and legal responsibilities of any possible local or international copyright issues regarding the use of tables, figures and other images belong to the author(s). The author will be responsible for any losses that the journal may incur as a result of these issues.

Rejected manuscripts will not be returned except for artistic pictures.

Manuscript format should be arranged according to the rules stated in *ICMJE-Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals* (updated in December 2014 - <http://www.icmje.org/icmje-recommendations.pdf>).

Presentation of manuscripts should be in accordance with international guidelines. CONSORT guidelines for

randomized studies, STROBE guidelines for observational studies, PRISMA for diagnostic studies, PRISMA for systematic reviews and meta-analysis, ARRIVE for animal experimental studies and TREND for non-randomized behavioral and public health intervention studies should be taken into considerations.

In order to clarify the subjects of scientific contributions, responsibilities and conflicts of interest on an article, all authors should sign and send the Authorship Contribution Form and ICMJE Form for Disclosure of Potential Conflicts of Interest to the Editorial Office. A copy of each of these documents should be submitted online through the online manuscript submission system with the submission. Practices of the journal on this subject are coherent to the rules of International Committee of Medical Journal Editors (ICMJE) and Committee on Publication Ethics (COPE).

The Editorial Office inspects all submitted manuscripts concerning plagiarism and duplication. If a case of plagiarism or duplication is detected, sanctions will be imposed within the scope of the Committee on Publication Ethics (COPE) guidelines.

The authors should acknowledge and provide information on grants or other financial support received for the study provided by any foundations and institutions or firms.

An Ethics Committee Report, prepared in accordance with "Guide for the Care and Use of Laboratory Animals" of the Helsinki Declaration prepared by the World Medical Association (WMA), is required for experimental, clinical and drug studies and some case reports. The Editorial Office may request the report of the ethics committee or an equivalent official document from the authors if found necessary. Manuscripts reporting results of experimental studies practiced on volunteers and patients should include a patient and volunteer consent statement after explaining the procedure(s) thoroughly. For animal experimental studies, measures taken to reduce pain and discomfort should be clearly stated.

Manuscripts submitted for publication should be written in English. Manuscripts submitted in other languages will be rejected.

Editors inspect whether a submitted manuscript is prepared in accordance with the journal's manuscript preparation guidelines before assigning the manuscript to reviewers. Manuscripts which are not written in accordance with the journal's manuscript preparation guidelines will not be evaluated. Twenty-one days are allocated for reviewer evaluations of each article and if any corrections are required, 28 days are allocated for the author to implement the requested corrections. Corrected sections should be highlighted in yellow on the revised manuscript. Response to the reviewer's comments and the title page should be submitted separately through the online manuscript submission system.

All manuscripts will pass through a pre-evaluation process by the Editors and Associate Editors in the first stage

of submission. Subsequently, manuscripts are assigned to at least two reviewers for evaluation. Reviewers are selected among external and independent experts who also have publications in international literature in the same field. Research articles, systematic review articles and meta-analysis manuscripts will be checked by the statistical editor in addition to the assigned reviewers. All manuscripts are also checked for English grammar and manuscript preparation guidelines.

Any retraction requests of manuscripts close to the final decision, without reasonable explanation will be rejected. All authors of a manuscript accepted for publication should consent that editors could make corrections without changing the basic meaning of the text of the written manuscript.

Manuscript files should be prepared using the Microsoft Word programme. The Online Manuscript Submission and Evaluation System will guide authors openly at any stage and provide a rapid and sound submission process. Manuscript files should be structured regarding their type as stated below.

Research articles: The manuscript title should be stated first. A structured abstract of the article including Aim, Materials and Methods, Results and Conclusion sub-headings should be given below the title. Maximum total word count of the abstracts should be 200. At least 3, at most 6 keywords concordant with MeSH vocabulary terms prepared by the National Library of Medicine (NLM) should be included in each research article. The main text should include Introduction, Materials and Methods (with sub-headings), Results, Discussion, Study Limitations, Conclusion, References, Tables-Figures-Images sections and it should not exceed 5000 words. A maximum of 50 references is sufficient regarding acceptability. Informed consent declaration and information on ethics committee approval (including the name of the committee, the date of the decision, and the number of the decision) should be provided in the materials and methods section of the manuscript.

Statistical analysis should be performed in accordance with guidelines on reporting statistics in medical journals (Altman DG, Gore SM, Gardner MJ, Pocock SJ. Statistical guidelines for contributors to medical journals. *Br Med J* 1983; 7; 1489-93). The software used for statistical analysis should be described. When parametric tests are used for comparison of continuous variables they should be presented as Mean±Standard Deviation, while for non-parametric tests data should be presented as Median and range (Minimum- Maximum) or Median and interquartile range (25th and 75th percentiles). Whenever complex analyses are used the relative risk (RR, relative risk) odds or (OR, odds ratio) and hazard ratios values (HR, hazard ratio) should be supported by providing confidence intervals and p values.

Review articles: Manuscripts prepared by experts who have extensive knowledge in the field and whose knowledge has been projected to the literature as publications and citations will be evaluated. Review articles

EAJEM

Eurasian Journal of Emergency Medicine

Citation abbreviation: Eurasian J Emerg Med (Formerly Akademik Acil Tip Dergisi)

should be prepared concerning the latest clinical progressions on a piece of information or a subject in a format which explains, discusses, evaluates and guides future studies. Review articles should include a title and an unstructured abstract of a maximum 200 words. At least 3, at most 6 keywords concordant with MeSH vocabulary terms prepared by the National Library of Medicine (NLM) should be included. With regard to the content of the manuscript, sub-headed main-text, references and tables-figures-images should be included. Total word count of a review article should not exceed 5000.

Case reports: Our journal reserves a limited space for case reports. Only interesting and informative case reports which are about rare, diseases which are difficult to diagnose and treat or which suggest a new method, include new information which cannot be found in the literature, will be published. A title and an unstructured abstract of maximum 200 words should be included in each case report. At least 3, at most 6 keywords concordant with MeSH vocabulary terms prepared by the National Library of Medicine (NLM) should be included. The main text should include Introduction, Case Presentation, Discussion, Results, References and Tables-Figures-Images sections. Total word count should not exceed 1500. Case reports should not include more than 10 references.

Editorial comment: Editorial Comments should include short discussions on a research article published in the journal by an author from the same field or a successful reviewer. At the end of editorial usually a summary on clinical significance of the study is required.

Letters to the Editor: This type of manuscript discusses the importance, missing parts or an overlooked structure of a previously published article. Authors can also submit their comments to the editor on a subject which may be in the reader's field of interest especially on educational cases, in the Letter to the Editor format. Number of references should be limited to 5 and no titles of sub-headings are required. A Letter to the Editor should not exceed 500 words. Volume, year, issue, page numbers, title and author names of the article mentioned in a Letter to the Editor should be stated clearly.

Scientific letter: Manuscripts with prior notification characteristics, announcing new, clinically important scientific developments or information are accepted as Scientific Letters. Scientific Letters should not include sub-headings and should not exceed 900 words. Number of references should be limited to 10 and number of tables and figures should be limited to 2.

Education: Results of recently concluded research and conclusive information used in academic education and clinical practice are presented in detail in this type of manuscripts. With regard to the content of the manuscript, sub-headed main-text, references and tables-figures-images should be included. Total word count should not exceed 5000 and total reference number should be limited to 50.

Clinical imaging

Visual Diagnosis: Images must be typical for diagnosis, and should facilitate rapid diagnosis for emergency medicine and / or should be educational. Except for the header and references, it must consist of maximum 400 words. A maximum of three authors name, six images and five references should be included. Abstract should not be needed.

History: This type of manuscript explains events related to emergency and general medicine and presents information on the history of diagnosis and treatment of diseases. Historical findings should be a result of relevant research studies. Manuscript should not include sub-headings, should not exceed 900 words and total number of references should be limited to 10.

Publication ethics: This type of manuscript includes current information on research and publication ethics and presents cases of ethics infringement. Main text should not exceed 900 words and total number of references should be limited to 10.

Author names, institution details, contact details, should not be included in the submitted document. These details should be filled in the relevant sections in the online manuscript submission system.

All tables, figures, graphs and images should be visibly numbered within the article text and patient, doctor and institution names should not be visible in these. For microscopic figures, in addition to explanatory information, zoom levels and coloring techniques should also be stated. Line drawings should be done in a professional manner and on pictures showing a patient's face, patient name and eyes should be covered so that the identity of the patient is not revealed. All images should be in high resolution at minimum 300 dpi. Lines with sufficient thickness should be used in graphs thus preventing possible losses if resizing is necessary. Widths of images should be either 9 or 18 cm. Images prepared by professionals are more appropriate. The color grey should not be used in images. Used abbreviations should be explained below with each image in alphabetical order. Roman numerals should not be used in table and figure headings and sub-texts. Decimal numbers used in the main text, tables and figures should be separated with a dot. Especially, tables should be prepared to explain the main text or help readers understand the main text more easily; they should not be a repetition of the main text.

References should be numbered in the order of citation in the main text. Only published studies or studies accepted for publication should be cited. Abbreviations of journal titles should be done in accordance with journal abbreviations used in Index Medicus. For publications with 6 or less authors, a list of all authors is required, for publications with 7 or more authors, the first 6 authors should be listed, followed by "et al.". Reference styles and punctuations should be in accordance with the examples below.

Periodicals: Lewin MR, Stein J, Wang R, Lee MM, Kernberg M, Boukhan M, et al. Humming is as effective as Valsalva's maneuver and Trendelenburg's position for ultrasonographic visualization of the jugular venous system and common femoral veins. *Ann Emerg Med* 2007; 50: 73-7.
