Yazarlara Bilgi
Yazarlara Bilgi dergi sayfalarında ve www.oftalmoloji.org web sayfasında yayınlanmaktadır.

Materyal Sorumluluk Reddi
Türk Oftalmoloji Dergisi'nde yayınlanan tüm yazılarıda görüş ve raporlar yazarların görüşüdür ve Editör, Editörler Kurulu ya da yazarların görüşü değildir; Editör, Editörler Kurulu ve yazarın bu yazılar için herhangi bir sorumluluk kabul etmemektedir.

Dergimizde acid-free kağıt kullanılmaktadır.
Aims and Scope

The Turkish Journal of Ophthalmology is the periodical of the Turkish Ophthalmology Society and has been published since 1971. It covers subjects on ophthalmology, being published in Turkish and in English language, and is an independent international periodical based on peer-review principles. A manuscript will be considered only with the understanding that it is an original contribution that has not been published elsewhere. The Turkish Journal of Ophthalmology is regularly published six times a year, and special issues are occasionally released.

The aim of the Turkish Journal of Ophthalmology is to publish original periodic research papers of highest scientific and clinical value on ophthalmology, continuously and in international level. Furthermore, review articles, case reports, editorial comments, letters to the editor, educational contributions and Congress/meeting announcements are released.

The Turkish Journal of Ophthalmology is indexed in the Galen/Cengage Learning, Index Copernicus, EBSCO Database, Scopus, CINAHL, Turkish Medline-National Citation Index and TUBITAK/ULAKBIM databases.

Subscription Information
The Turkish Journal of Ophthalmology is sent free of charge to the subscribers. The address changes should be immediately reported to the affiliates and to the managing editor. The subscribers who do not receive the journals in the concerning periods should refer to the managing editor. All published volumes in full text can be reached free of charge through the web site www.ofthalmoloji.org. Requests for subscription should be addressed to the Turkish Ophthalmology Society.

Instructions to Authors

Manuscripts in Turkish and English are accepted for publication in the Journal of Ophthalmology which is the periodical of the "Turkish Ophthalmology Society". The scientific and ethical liability of the manuscripts belongs to the authors and the copyright of the manuscripts belongs to the Turkish Journal of Ophthalmology. Authors are responsible for the contents of the manuscript and accuracy of the references.

The abbreviation of the Turkish Journal of Ophthalmology is TJO; however, it should be denoted as Turkish Journal of Ophthalmology when referenced. In the international index and database, the name of the journal has been registered as Turkish Journal of Ophthalmology and abbreviated as TJO. All manuscripts submitted for publication must be accompanied by the Copyright Transfer Form (copyright transfer). Once the form is signed by all the authors, it is understood that neither the manuscript nor the data it contains have been submitted elsewhere or previously published and authors declare that they have no conflicts of interest and responsibilities of all authors.

For the experimental, clinical, and drug studies having the obligation of being approved by ethical committee and being sent in order to be published in the Turkish Journal of Ophthalmology, ethical committee approval report must be in accordance with the international agreements with Helsinki Declaration revised in 2008 required is available (www.wma.net/en/ethics/b3.html).

In experimental animal studies, the authors should indicate that the procedures followed were in accordance with animal rights "Guideline for the care and use of laboratory animals" (available at http://www8.nationalacademies.org/dpe/). All surgical and other medical interventions involving animals were followed by anesthetic agents. The approval of the ethical committee and the fact that the "informed consent" is given by the patients should appear in the manuscript.

All manuscripts are reviewed by the editor, concerned associate editors and at least three expert referees. The scientific board guiding the selection of the papers to be published in the Journal consists of elected experts of the Journal and, if necessary, selected from national and international authorities. The authors of the accepted manuscripts should be in consent that the editor and associate editors can make corrections without changing the main text of the paper.

In case of any suspicion or claim regarding scientific correctness, ethical infringement, the Journal reserves the rights to submit the manuscript to the investigating institutions or other authorities for investigation. The Journal accepts the responsibility of following-up the issue but does not undertake any responsibility for an actual investigation or any power of decision.

Manuscript format in accordance with Uniform Requirements for Manuscripts Submitted to Biomedical Journals (14th edition), in Writing and Editing for Biomedical Publication, (http://www.nlm.nih.gov/). The journal abbreviation in the medical archives websites is TJO.

GENERAL GUIDELINES

Manuscript: The manuscript can only be submitted electronically through the web site www.irisagent.com/tjо after creating an account. This system allows online submission and review. The submission must be accompanied according to CMOS (www.cmso.org). Index Medicus (Medline/PubMed) and Ulakbim-Turkish Medical Index Rules. Rejected manuscripts, except artwork are not returned. Manuscripts should be double spaced throughout, with 2.5 cm margin at all sides, 12 pt Arial font and 1.5 line spacing, using the software Microsoft Word. Abbreviations should be defined in the title page and should not be used on in the main text. Abbreviations made are not to be repeated in the body text. All abbreviations must be stated in the text. This list should be restricted to those that are very necessary for convenient expression of the text. Use of abbreviations should be defined in the text.

Guideline: The author should include statements about manuscript category according to the journal, single journal submission declaration, conflict of interest statement, sources of outside funding, equipment if any, approval for language in English and approval for statistical analysis for original research articles. 

BYOOSTATISTICS

To ensure centralization of the research findings, the study order, the sample, the methodological approach and the applications should be explained and their resources should be submitted. "P" value defined as the sign of statistical analysis and should not be repeated more than once. "N" values should be defined twice in the table and the text. "t" value, "F" value and "R" value should be defined in the text. "t" values should be defined as t (df, p value) and should not be repeated in the text. "F" values should be defined as F (df between, df within, p value) and should not be repeated in the text. "R" values should be defined as R (df between, df within, p value) and should not be repeated in the text. The results are considered to be significant if the p value is less than 0.05.

MANUSCRIPT TYPES

Original Articles: Clinical research should comprise clinical observation, new techniques or laboratory studies. They should include title, abstract, key words relevant to the content of the introduction, methodology and results sections. The reference list should contain the minimum number of references, tables, charts, pictures and acknowledgment. Title, abstract and key words should be written in Turkish and English. The manuscript should be written in accordance with the above mentioned rules and should not exceed sixteen (16) pages.

Title Page: This page should include all the name of the title, authors and the journal name. A word processing software was repeated twice in the abstract.

Abstract: The abstract should be written in English and should not exceed an average of 250 words. The first 250 words should be written in the language of the country. The abstract should have four sections: Introduction, Methods, Results and Discussion. Each section should be written in one paragraph. The results should not be cited in the summary section. As far as possible, use of abbreviations is to be avoided. If any abbreviations are used, they should be defined in the text. The summary should be written with four running titles. A structured abstract should be provided according to the following format:

Introduction: The aim of the study should be clearly stated.

Methods: The study should be defined as the standard criteria. It should also be indicated whether the study is randomized or not, whether it is retrospective or prospective, the statistical method, if any, should be indicated.

Results: The detailed result of the study should be given and the statistical significant level should be indicated.

Conclusion: It should reflect the results of the study. Its clinical applicability should be defined, the tangible and intangible advantages should be declared.

Key words: A list of minimum 2, but no more than 5 key words must be followed. Key words in English should be consistent with "Medical Subject Headings (MeSH)" (www.nlm.nih.gov/mesh/BBrowser.html). Turkish key words should be direct translation of the terms in English.

Introduction: Brief explanation about the topic should be done, the objective of the study should be stated and should be supported by the literature information.

Materials and Methods: The study plan should be given. It should be indicated whether it is randomized or not, whether it is retrospective or prospective and the number of trials, the characteristics, the used statistical methods should be indicated. If it, it should be indicated that the results should be unconfounded.

Results: The results should be given. They should be organized in the tables and the graphs. The results should be indicated in accordance with statistical analysis methods.

Discussion: The obtained values should be compared with the "favorable" and "unfavorable" aspects and should be compared with literature. The conclusion of the study should be highlighted. Acknowledgment: Any technical or financial support, or editorial contribution statistical analysis, English/Turkish evaluation contributions towards the study should appear at the end of the article.

References: Authors are responsible for the reality of the references. References should be numbered consecutively in the order in which they are first mentioned in the text. If references are used in the text, they should be indicated as a superscript immediately after the word, at the end of the relevant sentence. If author/authors of references are used at the beginning of the sentence, this reference should be written as a superscript immediately after author’s name. If number of authors is 4 or less, all authors should be indicated, if they are 5 or more, only the first three should be listed and after the third name of "et al" or “et al” (in Turkish references) should be given. Care must be taken to indicate Turkish reference, if exists. Presentations participated in congresses, unpublished manuscripts, theses, internet addresses, personal interviews or experiences should not be indicated as references. If such references were to be mentioned, in order to specify the nature of them, they should be indicated at the end of the sentence passed in the text, without reference number and in parenthesis as open letter.

Reference Format: Journal, last name(s) of the author(s) and initials, article title, publication title and its original abbreviation, publication date, volume, the inclusive page numbers.

Books: last name(s) of the author(s) and initials, chapter title, book editor, book title, edition, place of publication, date of publication and inclusive page numbers. If chapter title appears in the cited paper, it should be written as a superscript immediately after the name of the author. If number of authors is 4 or less, all authors should be indicated, if they are 5 or more, only the first three should be listed and after the third name of "et al" or “et al” (in Turkish references) should be given. Care must be taken to indicate Turkish reference, if exists.

Tables, Figures, Pictures: Picture legends and pictures: Picture should be numbered and labeled according to a brief title. Permanently to reproduce picture that were published elsewhere should not be included. All pictures should be of the highest quality possible at a minimum resolution of 500 dpi.

Tables, Graphics, Figures: All tables, graphics or figures should be annotated according to the sequences within the text and a brief descriptive caption should be written. The abbreviations used should be definitely explained in the figure’s legend. Especially, the text of tables should be easily understandable and should not restate the data in the main text. All textual material including legends should be located on separate pages following the text.

Case Reports: Case reports should include cases which are rarely seen and different in diagnosis and treatment, and should contribute to our present knowledge. Title in Turkish and English, unstructured summary not exceeding 150 words and key words should be located on the first page. The main text should be consists of introduction, case report, discussion and references. All the text should not exceed 5 (5) pages. Letters to the Editor should be published in the journal. Letters should be submitted to the Turkish Ophthalmology Society. They should be addressed concerning current developments in ophthalmology from the scientific and social aspects. Letters to the Editor may be submitted in response to a manuscript in the current issue. Letters should be between 500 and 1000 words and should not exceed 10 references. The Correspondence: All correspondence can be done to the following personal address or to the following e-mail address, which is the official editorial address: Turkish Ophthalmology Society, Milli Cad. Ülker Apt. 5 Blok No. 217 06657 82403 Ankara-Turkey. Phone: +90 312 422 99 49 80. Fax: +90 312 529 73 90.

Saygılarımla
Prof. Dr. Nevbohar Tançelik
Türk Oftalmoloji Dergisi Editörü
Editorial

Respectable colleagues,

Our website is reorganized and is presented to your liking to include more information with its new design. All changes can be followed by entering the website www.ofthalmoloji.org

Indexes that cover the Journal of Turkish Ophthalmology are increasing day by day and it is indexed in the Gale/Cengage Learning, Index Copernicus, EBSCO Database, Turkish Medline-National Citation Index and TUBITAK/ULAKBİM Türk Tip Dizini (Turkish Medical Index), and Scopus (new indexed).

Section of “selections from the editor” will be included in the next issues. Article selected from the editor will be forwarded to a relevant colleague to receive opinion regarding the article, and his/her opinion will be included in the section of “selections from the editor”. In addition, panels and presentations that may be of interest from Turkish Ophthalmology Society National Congress and Symposium will be published in our journal.

Publications and statistical rules are being handled and re-evaluated along with our statistical consultant, changes will be shared with you in the next issue.

We request to send your original studies to TJO, journal of all ophthalmologist in our country, and we look forward to your valuable contributions and suggestions.

We thanks you dear colleagues who give countenance to us and illuminates us with their suggestions. With warmest regards.

Best regards
Prof. Dr. Nevbahar Tamcelik
Editor of Turkish Journal of Ophthalmology
